Dump *Trailers*

From the desk of

M.A.C.

Michael A. Conroy

It gives me great pleasure to introduce you to our product family of MAC trailers. As I reflect, it seems like just yesterday that I started in business as a one man operation repairing wrecked trailers in a single bay garage that led to my first new dump trailer built to meet the rigorous demands of the coal fields in Kentucky and West Virginia. Today, MAC Trailer has grown to be the nation's foremost manufacturer of dump, flatbed, drop deck, transfer, dry bulk pneumatic tank and liquid tank trailers. Between the two Alliance, Ohio Corporate offices and manufacturing plants, Aftermarket Parts, Inc. and Showroom, MAC Service, the Salem, Ohio Facility, MAC Liquid Tank Trailer in Kent, Ohio and Billings, MT Manufacturing and Parts/Service, MAC Trailer now encompasses over 668,000 square feet of facilities on campuses over 115 acres with a staff in excess of 1100 employees that services both national and international markets. We have also proudly expanded our dump line manufacturing into Oklahoma City, OK and Lima, OH to better serve our customer's needs.

I am proud to say the success of MAC Trailer can be attributed to a quality product built by quality people, complemented by an experienced and knowledgeable sales staff and professional Dealer network; supported by a full service and repair facility and complete aftermarket parts department; all committed to a higher level of customer service.

My philosophy is to listen and learn from our customers and pursue continuous improvement through strong leadership and dedicated employees while providing added value in our product - FOR YOU.

I invite you to experience firsthand the personalization that truly solidifies the MAC difference.

A Commitment to

Visionary *Technology*

As a manufacturer, MAC Trailer recognizes the complexity of today's ever changing market and the necessity to make you more competitive with advanced design trailers that will reduce weights, increase payloads, maximize performance and enhance your profitability.

For MAC Trailer, technology is not something you purchase, but rather have the vision and ability to create. All of us are constantly listening to YOU the customer. We are going onto job sites to better understand and witness first hand the demands of your individual applications and its impact on the trailer's design and structural integrity. With this direct and personal field knowledge, we then engineer and manufacture a product with a higher level of innovative and creative technology.

With such a driving force, MAC's commitment to always strive for the betterment and efficiencies of your operations has been quite evident over the years.

What does the future hold? We will continue to listen to you. And MAC TRAILER WILL CONTINUE THE VISIONARY QUEST OF TECHNOLOGY!

MAC Aluminum

Traditional *Dump Trailers*

Traditional Aluminum Dump Trailers

It is our guarantee that when you purchase a MAC Trailer, you are getting the finest quality built trailer in the industry. Every aspect of your MAC dump has been engineered to give you many years of maintenance free satisfaction. From the splice free wiring, to the machined bushings with threaded in zerk fittings, to the stress proof pins on all the hinge areas, you are going to experience the MAC difference!

Optional Features

- Axle configuration
- Wheel styles/tires
- Aluminum/steel chassis
- Length/height/width
- Bulkhead radius/sloped
- Gate hinge style
- Paint - pinstripe color
- LED lighting
- Stainless/plastic liners
- Tarp styles
- Fabricated frame

Extruded overslung tailgate block with 1144 stress proof stationary pin and threaded in grease zerk fittings

Safety First! MAC has engineered the Air operated ground control that allows the driver to switch from over slung to side swing while standing on the ground without having to climb the side to engage the pins.

LED Lights are mounted on hollow bottom rail, allowing complete closure of the wiring harness system, safe from all elements.

MVP MAC Vertical Panel Dump Trailers

MVP-MACLOCK™

Aluminum Smooth Side Dump Trailers

The side wall panels are 15 1/2" wide by 1 1/2" deep, 5 void extruded aluminum hollow core panels that are fully welded top to bottom on the interior wall of the trailer to help prevent material lodging into the joint and to provide added side wall strength. The fully polished, WELDLESS EXTERIOR offers a mirror finish for company imaging and ease of cleaning. 15 1/2" wide by 2 1/4" deep panels are also available for severe and heavy haul applications. A hollow designed extruded 6061 T6 aluminum bottom rail houses the lights and wiring for protection from the weather and road elements.

Easier to Repair if Needed.

Optional Features

- Heavy wall thickness
- Slope nose or radius corner bulkhead
- Heavy duty coal hauler specifications
- Air ground control for side swing gate

The Panel Floor provides trailers with maximized operations and reduces maintenance costs all while assisting in eliminating buildup of road debris. Provides excellent underbody wind resistance and is constructed of 12" extruded hollow core Aluminum panels with 3-1/2" depth and a .250 inner floor wall.

Cast steel overslung sideswing gate hinge.

Removable coal door.

MACsimizer Aluminum

Half Round

Dump Trailers

MACsimizer Aluminum Half Round Trailers

The MACsimizer Half Round has proven itself to be a light-weight rugged workhorse of the MAC family of dump trailers. Just like all MAC trailers, the Half Round comes with the quality details that you have come accustomed to.

Radius Bulkhead – Low profile front end with a lower center of gravity providing a 7" lower front end and a 6" lower back end with 31" less flat space on the bulkhead compared to the Standard flat bulkhead.

Maximizes aerodynamics = Increased fuel mileage

Aerodynamics – Smooth side walls create less drag resistance. Better fuel economy = Better Operational Profit

Weight – As low as 8900 lbs., less liner and tarp. Depending on options applied.

Stability – Loads stay centered in the belly while dumping due to the round design.

Six Piece Design – Each side wall section overlaps the floor panel. Maximum Strength - Easier for repairs

When you need the advantage, MAC will differentiate you...

Optional Features

- .190 or .250 side walls
- 56"- 60"- 64"- 68" side heights
- 64"- 68" with 1/4" material only
- Aluminum frame
- 60"- 69"- 120" – or full width liners

Large radius gussets on bulkhead

Full length rubber on longitudinals

28' Quad Axle
with 66" sides
with full length
bolt on fenders

Steel Dump Trailers

MAC Steel Trailers

The MAC Steel Dump Trailers are in a class of their own with a design and construction to severe hauling requirements. Whether you are looking for the maximum capacity maximum durability of the 100 cubic yard, AR 450 "SCRAPMAC" for the severe applications, the lightweight half round or radius design, regardless, MAC Trailer offers it all.

Improved aerodynamics with our new radius style bulkhead = Increased fuel savings. Now standard on all MAC steel dumps.

Also offering a 102" wide option for a 100 cubic yard maximum capacity.

Available in the MAC Steel Lite package with the following aluminum options: sub-frame, frame, draft arms, tailgate, dollies, fenders, and wheels = Over 1,000 lbs in weight savings.

All MAC steel dump trailers are built with 3/16" or 1/4" AR450 material.

Body styles – the half round design for the greatest impact resistance and the 22" radius body with a flat floor to maximize cubic yardage capacity.

Available in frame type or frameless.

The air assist high lift gate option is also available. The cylinders and lift assembly are enclosed in the rear pockets for protection against loading and external exposure.

Optional Features

- Floor & side sheet thickness
- Steel or aluminum chassis
- Paint colors/finishes
- Air assist high lift gate
- Double hinge dump shoes
- Tarp styles
- LED lighting

Steel gate latches

Double hinge shoes

High lift gate

Color coded air lines

Totally enclosed wiring

Push bumper/tow hooks
